Title of the Project

“ANALYTICAL STUDY ON THE JOB STRESS OF PARAMEDICAL STAFF WORKING IN NIGHT SHIFTS AT HATTA HOSPITAL”

STATEMENT OF THE PROBLEM

Job stress among paramedical staff in Primary Health care centers was not extensively studied as in medical or hospital nursing staff. The aim of the present study was to reveal the work characteristics in the PHC centers in Dubai, with its stressful hazardous conditions as perceived by the working paramedical staff. The study revealed that this staff is facing heavy workload with low decision and control latitude.

OBJECTIVES OF THE STUDY

1. To identify the main reasons of stress among the paramedical staff at Hatta Hospital and the effect of stress on their performance.
2. To compare the level of occupational stress and occupational stressors among the Hatta Hospital.

RESEARCH METHODOLOGY

Methodology adopted

The research is aimed at studying the job stress of paramedical staff working in night shifts.

Research design

The survey method is the basic research design. The structured questionnaire will be administered to the respondents, which solicits information about their level of job stress.

Sample size

A survey of approximately 100 respondents.

Sampling plan

Sampling is an effective step in collection of primary data that influences the quality and correctness of the result.

Sampling techniques

The technique used for conducting the study will be Convenience Sampling Technique as sample of respondents was chosen according to convenience.

DATA COLLECTION METHODS

The data will be collected using both by primary data collection methods as well as secondary sources.

Primary Data: Most of the information will be gathered through primary sources. The methods that will be used to collect primary data are:

- a) Questionnaire
- b) Interview

Secondary Data: Secondary data that will be used are web sites and published materials related to job stress among the paramedical staff as well as any relevant information on Hatta Hospital.

The secondary data will be collected through:

- Text Books
- Magazines
- Journals
- Websites
